Dear Paul:

As per our conversation this morning we will finish the four additional beacons without the XRX unless we can get material from the P Corp. this week. This can be added at any time but I do want to complete the job which we originally started.

In addition to this, I am sending one dozen XRX 30 filters to fit the flashlights and you can make your own choice as to which you prefer to use.

I have copies of packing slips signed by you and I am wondering whether these are sufficient so that I can put through the billing according to all the formal red tape necessary; at least so that  can receive payment for work done. I think by the end of this week I will be able to pull together all costs on this second go-around and any attention which you can give to getting the second contract so that I will have a number against which to bill will certainly be appreciated.

50X1

To sum up, you are carrying the ball on the following:

1. Payment for the original work - \$4000 - under Contract No. XG-743.
2. The contract for the XRX material - \$5000 - has been billed but as yet we have received no payment.
3. The contract for the work on the second group of beacons has not yet been received by us, so while the work has been practically completed, I have nothing to bill it against.

Anything that you can do to expedite matters will certainly
be appreciated.

Very truly yours,
